

ColourVUE®

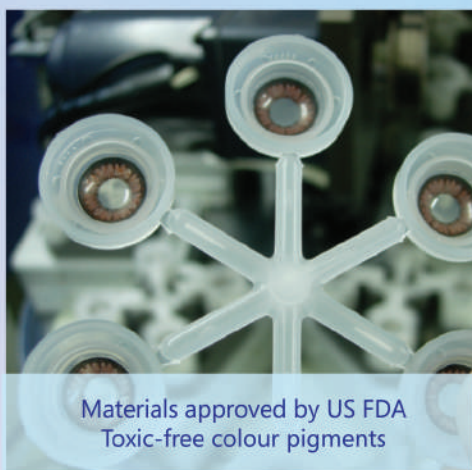

THE SAFEST COLOURED CONTACT LENSES

RECOGNIZED BY OPTICAL EXPRESS EXPERT IN UNITED KINGDOM

European CE certified facilities and clean room production environment

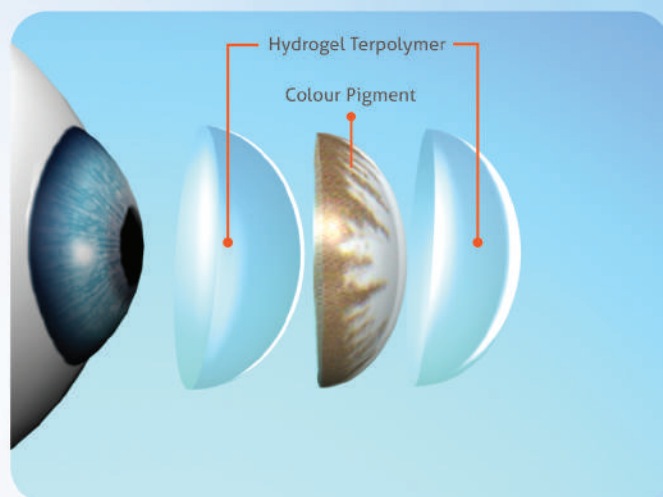

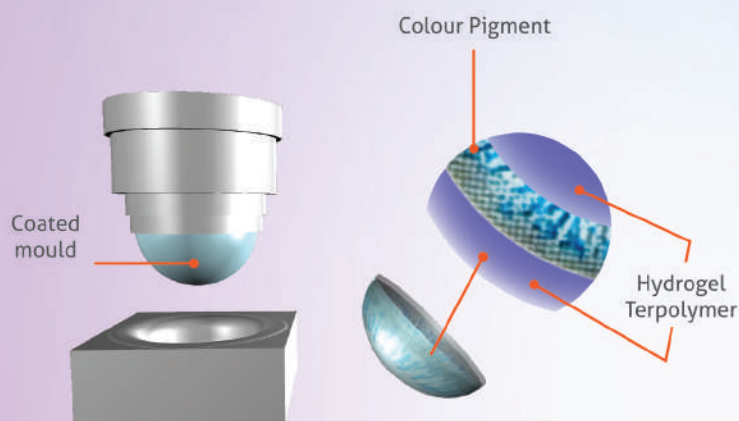

Materials approved by US FDA
Toxic-free colour pigments

100% inspection at every stage of production to ensure that they are defect free.

Maxvue contact lenses are made only with US FDA approved materials. Our proprietary double coating sandwich and 3 stages pressurized curing processes ensure colour materials are firmly locked and never get in contact with eyes. Maxvue contact lenses are safe without any side effects.

MAXVUE VISION - devoted its passion and dedication to realize our customer's dream to have the eye colour and costume that blends well with their life style. Today our MAXVUE contact lenses made this possible for millions of customers worldwide. Widest range aside, the many reviewers and users that found comfort with Maxvue's contact lenses are unmatched.

MAXVUE VISION's products are marketed in more than 60 countries worldwide and expanding year after year. These are achieved through our relentless pursuit for better design, quality and customer service aided by our extensive industrial knowledge, expertise and research resources.

MAXVUE VISION - an ISO9001 and ISO13485 certified organization complies with stringent quality control and regulatory requirements needed by various Health and Medical Device regulators around the world such as Singapore HSA, European CE, Australian TGA and Canadian CAMCAS. Our products are manufactured in accordance with these requirements using state of the art manufacturing technology and materials.

Raya Mint

RAYA

*Super Comfortable
Silicone Hydrogel Colours*

RAYA

- Fine Heritage Through New Technology

Raya, an ethnic Malay word meaning “Grand”. Often associated with big celebrations like, “Hari Raya” – the biggest festival in the country, and “Bunga Raya” – The Grand Flower which refers to the Hibiscus, our national flower. We named ColourVUE's latest Silicone Hydrogel collection as RAYA to celebrate the launch of this finely crafted lens.

Just like the Malaysian fine “Batik” art of making traditional clothing, we carefully crafted the RAYA series with the finest colour printing using latest materials and processes. It's made with stable and proven Airsoft silicone hydrogel material to ensure that your eyes continue to breath, remain healthy, and white for long hours. Our fine dotted design, borrowed from Lumina production, created this exceptionally natural and beautiful looking lens.

Breathability, Comfort & Beauty - Best 3 in 1 lens

COMFORT
Excellent full day comfort even in extended hours.

OUTER RING
Slight enlargement effect for bigger & brighter eyes.

BREATHABILITY
Allows more oxygen than your regular lens.

PRIMARY COLOURS
Combine two colours for a very naturally beautiful look.

BEAUTY
Unique printing technology that enhance any eye colour.

THE MOST SUITABLE MULTIPURPOSE SOLUTION FOR COLOUR CONTACT LENSES

AIRLINE
FRIENDLY

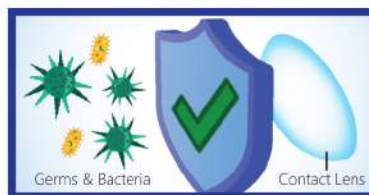

*Solution available in 60ml, 100ml, 120ml, 360ml and 500ml.

*Rewetting Drops available only in 10ml.

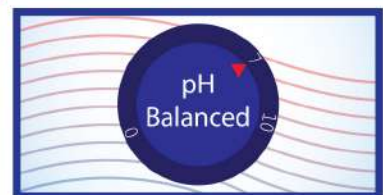

7 FUNCTIONS

- Lubricates
- Disinfects
- Wets
- Rinses
- Cleans
- Stores
- Removes protein

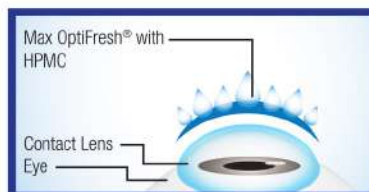

MAX OPTIFRESH® BENEFITS

Keeps lens free of germs and bacteria

Keeps solution PH balanced & enhanced performance

Retains moisture and prevents dryness, with long-lasting comfortness

Removes and releases protein and liquids from the lens

Fast Clean Option
Rub and soak for 4 hours.

Rub Free Option

Rinse the lens carefully and then soak it in Max Optifresh® Solution for at least 6 hours. This option is used with frequent replacement lenses (1 month or less). Rubbing is the preferred cleaning method for conventional soft lenses.

Bio-Inspired Solution, Protect Like Your Own Tears

Fights lens dehydration due to pollution & varying environmental conditions

Ideal for patients that find lenses dry out at the end of the day

Safeguard lens from germs, proteins & lipids

Formulated for patients with dry & sensitive eyes

Locks in moisture & retains it in dry environments

Balances pH level to match healthy tears

Double Moisturizing Effect

Max OptiFresh® bioplus with HPMC + Sodium Hyaluronate (HA)

Contact Lens
Eye

Double Moisturizing Effect

- Extra protection against the corneal surface
- Reduce ocular surface damage

HA & HPMC:

- Forms a lubricating shield on the lens
- Conditions lens, seals in moisture
- Slowly releases it throughout the day.

Clinically Tested:

- Max OptiFresh® bioplus was associated with a statistically significant improvement in initial comfort, end day comfort, clear vision and enhanced overall lens wearing experience more effectively than test subjects previous solution.
- More than 92% agree Max OptiFresh® bioplus enhance overall lens wearing experience.
- More than 93% will continue using Max OptiFresh® bioplus.

**Available in 60ml, 100ml and 360ml*

NEW

**7ml Minidose HA Solution
5pcs per strip**

Max OptiFresh® bioplus

Moisturising & Comfort Drops

Perfect choice for Every Contact Lens User

Treatment of Dry & Sensitive Eyes

200% More Concentration of Hyaluronic Acid (HA)

**For Comfort That Last
2x Longer Than Any Other Drops**

Efficient lubrication

Long Moisturizing effect

Protects corneal surface

Extends tears film stability

Repairs damaged ocular surface
